Physics Experiments

Physics experiments and other physics related research have influenced our world in many different ways. It has revolutionized modern technology and has changed how we view the world.

The banner features a bright orange background. At the top center is a white icon of a flask with a flame, followed by the word "EXPLORABLE" in white, uppercase letters. Below this, the phrase "Quiz Time!" is written in a white, cursive font. Underneath, there are three white-bordered rectangular boxes. The first box on the left shows a pair of red roller skates on a wooden floor, with the text "Quiz: Psychology 101 Part 2" below it. The middle box shows a fan of colorful pens, also with the text "Quiz: Psychology 101 Part 2" below it. The third box on the right shows a Ferris wheel at sunset, with the text "Quiz: Flags in Europe" below it. In the bottom right corner of the banner, the text "See all quizzes =>" is written in white.

Ben Franklin Kite Experiment

Benjamin Franklin believed that lightning was a form of static electricity, on a huge scale. In the [Kite Experiment](#) [1], he flew a kite into the storm clouds and conducted electricity down the kite string, attempting to see if an electrical charge was produced.

Brownian Motion

Robert Brown, a botanist and biologist, discovered [brownian movement](#) [2] by accident, when he was looking at a sample of suspended pollen grains under a microscope. This discovery led to a series of important physics experiments.

J.J. Thomsons Cathode Rays

J.J. Thomson's innovative [cathode ray experiment](#) [3] greatly contributed to our understanding of the modern world. It improved our understanding on magnetism and atoms and was a great example of slowly building a theory.
